CURRICULUM VITAE · NOVEMBER 2026

Claudemir Custódio

JAVA & CLOUD ARCHITECTURE CONSULTING · TECHNICAL MENTORING

contato@mibess.com.br · +55 16 99375-4887 (WhatsApp) · mibess.com.br
linkedin.com/in/claudemircustodio · github.com/mibess · Ribeirão Preto, Brazil (UTC-3) · remote and hybrid

PROFILE

Software engineer and consultant with 16+ years of experience, focused on Java architecture, AWS cloud and microservices. Today I work on mission-critical systems for the Brazilian electricity sector (CCEE). Before that, I built integrations with the country's largest banks and with PIX, Brazil's instant payment system, and led the migration of an on-premises monolith to AWS. I believe technology is more than code: it is experience, and the clarity to solve problems in a smart way.

HOW I CAN HELP

Architecture & performance

Technical consulting focused on architecture and performance.

Microservices · DDD · Clean Architecture · REST APIs

Digital transformation & agile squads

Digital transformation projects and agile squads.

Monolith → AWS · Docker · CI/CD · Scrum and Kanban

Mentoring & technical leadership

Mentoring and support for teams that need technical leadership.

Career · Technical challenges · Leadership

HIGHLIGHTS

Banking and PIX integrations

RTOOLS · 2010 — 2023

Integrations with the APIs of Itaú, Banco do Brasil, Santander, Bradesco and Caixa for bank slips (boletos) and remittance and return files, plus instant settlement via PIX.

From on-premises monolith to AWS

RTOOLS · 2010 — 2023

Moved the software from on-premises servers to AWS (EC2, S3, ECS) with Docker, reducing bugs and improving maintainability and availability.

Real-time access monitoring

RTOOLS · 2010 — 2023

Turnstile access control with cards and biometrics for gyms, clubs and schools, with a real-time web dashboard for screens and mobile phones.

Mission-critical microservices in energy

AMCOM · CCEE SQUAD · 2024 — PRESENT

New features and maintenance of microservices for energy trading and regulation, built with Java, Spring Boot, Oracle and Angular.

SKILLS

Backend	Java, Spring Boot, JPA/Hibernate, REST APIs, DDD, microservices, RabbitMQ, Python (Flask)
Infra & Cloud	AWS (EC2, S3, ECS, CloudWatch), Docker, CI/CD (GitHub Actions, Bitbucket Pipelines), PostgreSQL, Oracle, MySQL
Frontend	Angular, React, TypeScript, JavaScript, HTML, CSS, JSF, PrimeFaces
Practices	Unit and integration testing (JUnit, Mockito), Clean Architecture, Scrum and Kanban, Jira, Git, JasperReports

Familiar with NoSQL databases, Kubernetes and Grafana, not yet used in professional projects.

EDUCATION & LANGUAGES

2023 · Course	**Software Engineering** · Alura, Brazilian online technology school
2008 — 2009 · Diploma	**Information Technology and IT Project Management** · ETEC, São Paulo State Technical School
Languages	**Native Portuguese · Intermediate English** · fluent technical reading and daily meetings

Full experience and personal projects on page 2

PROFESSIONAL EXPERIENCE

AMcom · CCEE squad

Systems Developer

Jan 2024 — present
Ribeirão Preto, Brazil

- Develop new features and maintain CCEE's mission-critical microservices using Java, Spring Boot and Oracle.
- Build Angular interfaces focused on performance and a consistent user experience.
- Work with Git (GitHub/Bitbucket), Jira and agile practices to sustain delivery cadence and quality.

Rtools Desenvolvimento de Sistemas

Full Stack Java Developer

Jan 2010 — Sep 2023
Ribeirão Preto, Brazil

- Built a turnstile access-control system with cards and biometrics for gyms, clubs and schools (Java 7, MySQL, Swing).
- Created a web application to monitor access in real time on screens and mobile devices, backed by a Spring Boot microservice (ReactJS, REST, Docker, AWS ECS, GitHub Actions).
- Designed and developed modules of a management system for mid-sized companies, trade unions and associations (Java, JSF, PrimeFaces, PostgreSQL, JasperReports, Docker, Bitbucket Pipelines, Amazon S3, EC2 and CloudWatch).
- Delivered the frontend where members of unions and associations track their registration data, billing, appointments and approvals, with a focus on usability (Angular, Spring Boot, Docker, AWS, DDD).
- Implemented banking integrations (Itaú, Banco do Brasil, Santander, Bradesco, Caixa) for bank slip (boleto) issuance and remittance files, plus PIX payments for selected clients.
- Migrated the monolith from on-premises servers to AWS, reducing bugs and improving maintainability and availability; wrote unit and integration tests.
- Met with clients to define improvements and technical adjustments, working in a team using Scrum and Kanban.

Master Company Informática

IT Instructor

Jan 2009 — Dec 2009
Ribeirão Preto, Brazil

- Taught Photoshop, CorelDRAW and Microsoft Office to classes with mixed skill levels.
- Created tailored teaching materials and supported the school's graphic design projects.

PERSONAL PROJECTS

Bem vindo à Brodowski · digital experience about Cândido Portinari's hometown
`Next.js · React · TailwindCSS` — brodowski.vercel.app

UC Generator · consumer unit (UC) codes for the electricity sector
`JavaScript · Python · Flask · Docker · CI/CD` — geradoruc.mibess.com.br

E-learning Platform · online courses on microservices architecture
`Java · Spring Boot · Angular · PostgreSQL · AWS` — ead.mibess.com.br

Authentication System · authentication and authorization with Keycloak and Google Auth
`Java · Spring Boot · Angular · Keycloak · Docker` — github.com/mibess/auth

Blood Bank · processing of blood donor candidate data
`Java · Spring Boot · PostgreSQL · AWS · Docker` — citel.mibess.com.br

Cards Board · create and manage thought cards
`Angular · Spring Boot · PostgreSQL · AWS EC2` — cards.mibess.com.br

Password Manager · vault to store and manage personal passwords
`Angular · Spring Boot · PostgreSQL · AWS EC2` — secrets.mibess.com.br
